SAP   **1486490 - Delete a delivery note without eliminating the transfer order (WM)**

**Version** 1   **Validity:** 06.07.2010 - active   **Language** English

Symptom

It's possible to eliminate a delivery note without eliminating the transfer order (WM).

Environment

- SAP ERP Release Independent
- Logistics Execution LE

Reproducing the Issue

1. Open a Delivery in VL02N
2. Delete the delivery

Delivery will be deleted **without any message** (even though the delivery has a confirmed transfer order).

Cause

This is standard system behavior. If the new version of deleting delivery items is used (as described in SAP Note 521409), the message should be configured in order to appear.

Resolution

- Use Transaction OVM1 in Customizing to control the attributes of the message.
- The output attributes of message VL173 control how the system behaves during the deletion of picked or put away items.
