- |                    |                   |
|--------------------|-------------------|
| 3. Enter ticket id | 'TICKET' section  |
| in the 'Ticket ID' | should be         |
| edit box.          | displayed with    |
| 4. Click on        | default values.   |
| 'SEARCH'           | 3. User should be |
| button             | able to enter     |
|                    | ticket id in the  |
|                    | 'Ticket ID' edit  |
|                    | box.              |
|                    | 4. Ticket details |
|                    | should be display |
|                    | based on the      |
|                    | ticket number.    |

## Solution Details

---

1. Status will be selected as 'Created' by default in Change Management.
2. Tab index's we be applied to all the pages and the order of tabbing will be top left to right then next line.
3. Dates in all the pages are ordered in chronological order.
4. Indexing is applied to Project Number (Work order number column) in tblWorkOrder in database.
