

Summary

Symptom

Fields from AFS-specific material master tables cannot be used for the event creation through change documents for change document object 'MATERIAL' since AFS tables J_3AMAD, J_3AMADKA, J_3AQDST, /AFS/MLGN1, /AFS/MLGN2, /AFS/MLGN3, /AFS/MLGT, J_3AMSEA, /AFS/MVKE, J_3AMEAN, /AFS/MARM, /AFS/MLGT, /AFS/MARC, /AFS/QMAT, /AFS/MAP_MT2MC_R have not been entered in change document object 'MATERIAL'.

Other terms

Change pointers, Change object class

Reason and Prerequisites

For the fields of the AFS-specific material master tables, the system in addition writes change documents for object 'MATERIAL'. However, for technical reasons the tables are not entered in Customizing for change document object 'MATERIAL'.

Solution

After you have implemented the advance correction, you can use the AFS tables in Transactions BD52 and SWEC.

Header Data

Release Status:	Released for Customer
Released on:	02.03.2012 11:09:57
Master Language:	English
Priority:	Correction with low priority
Category:	Program error
Primary Component:	IS-AFS-BD Basic Data
